SKILLS

- Python Programming
- Network Security
- Frontend Web Development
- Penetration Testing
- Cryptography Fundamentals
- networking fundamentals
- linux
- Active learner

LANGUAGES

- English (Fluent C2)
- French (basic)
- russian (Basic)
- japanese (intermediate N3)
- bengali (native)
- hindi (intermediate)

PROFILE

Motivated cybersecurity and networking student with strong skills in Python, network security, and frontend development. Experienced in building security-focused projects and analyzing threats. Multilingual communicator with a proven ability to adapt and learn quickly in dynamic environments.

EXPERIENCE

- Developed Guinevere chatbot using Gemini API with a custom frontend for dynamic, context-aware conversations.
- Built NetSecure Toolkit — Python-based modular system for threat monitoring, log analysis, and real-time alerts.
- Created Quite-Move-Chess, a JavaScript chess app integrated with Stockfish 16 for advanced game analysis.
- Designed HomeScan and a personal portfolio website to audit networks, showcase skills, and present projects.
